### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
3. Claims 1, 5, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gross et al (US 4,560,671).

As to claims 1, 5, and 17, Gross et al disclose a method for activating olefin polymerization catalyst which contain transition metal, titanium as an active component (col. 3, lines 40-44), wherein the steps comprising introducing gas in the lower section containing a layer of catalyst, forming a fluidized bed, treating the catalyst in the fluidized bed by activation treatment (col. 2, lines 43-68). It would have been obvious to one of ordinary skill in the art at

Art Unit: 1725

the time applicant's invention was made to make the reactor taper downward, since it has been conventional to make fluidized bed tapers downward for easier to remove the product.

As to claim 16, there is no distribution plate.

4. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gross et al ('671) as applied to claim 1 above, and further in view of Wasserman et al (US 5,674,795).

Gross et al disclose the claimed invention above, but fails to teach a cyclone. However, Wasserman et al disclose a cyclone for separation. Therefore, it would have been obvious to one of ordinary skill in the art at the time applicant's invention was made to provide a cyclone as taught by Wasserman et al, in Gross et al to assist removal of the product.

#### ***Allowable Subject Matter***

5. Claims 14 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
